

NIKHILA KUTTAN

Frontend Developer

Bengaluru, Karnataka | nikhilakuttan03@gmail.com | +91-9744678990 | linkedin.com/in/nikhila-kk

Professional Summary

Frontend Developer specializing in building scalable, performant Angular applications with over 3.5 years of experience developing responsive Single Page Applications (SPAs). Proficient in Angular 9–18, HTML5, CSS3, TypeScript, Angular CLI, and Angular Material. Skilled in implementing RESTful APIs, state management using RxJS and services, and building component-driven architecture aligned with UI/UX best practices. Familiar with ReactJS concepts and capable of quickly adapting Angular patterns to React environment. Currently expanding skillset with Java and Spring Boot to contribute effectively to full stack development.

Technical Skills

- Frontend Frameworks & Tools: Angular 9–18, Angular CLI, Angular Material, Angular Forms, Angular Routing, Bootstrap, HTML5, CSS3, JavaScript (ES6+), TypeScript, ReactJS
- Backend (Learning): Java (Spring Boot), Python (Basics)
- State Management: RxJS, BehaviorSubject, Angular Services, Familiar with NgRx Store and Effects
- Micro Frontends: Integrating MFE using Angular Elements
- Productivity Tools: GitHub Copilot, Visual Studio Code,
- Cloud/Delivery Models: SaaS-based Applications
- Artifact & Package Management: JFrog Artifactory, NPM
- NPM Version Control & DevOps: Git, GitHub, CI/CD pipelines
- Testing: Unit Testing, E2E Testing
- API Integration: RESTful APIs, HTTP Interceptors, SAML-based SSO, Postman
- Architecture & Patterns: Component-driven development, Dependency Injection, Lazy Loading, Change Detection Optimization, Wireframing
- Database: MySQL, SQL Server
- Security Practices: Secure API handling, CORS, XSS Awareness
- Development Practices: Jira, Agile (Scrum), SonarQube, Test-Driven Development (TDD), Sprint Planning, Daily Standups, Retrospectives

Professional Experience

Senior Systems Engineer | Infosys Ltd | Bengaluru, India | 2021 – Present

- Developed and maintained responsive Angular SPAs (v9–18) using Angular CLI and Material Design in Agile Scrum teams.
- Integrated Micro Frontends (MFE) using Angular Elements to embed independently deployed modules within the host shell app.
- Used GitHub Copilot to accelerate development workflows, generate Angular scaffolds, services, and reusable utilities.
- Collaborated with cross-functional teams including designers, testers, and backend engineers to deliver features in sprints.
- Consistently delivered near bug-free code across project by enforcing strong typing, modular design and comprehensive unit testing, resulting in minimal QA escalation.
- Implemented RESTful API integrations with proper HTTP Interceptor handling and error management.
- Tested APIs using Postman and ensured robust API integrations in CI/CD workflows.
- Applied RxJS operators and BehaviorSubject for reactive programming and inter-component communication.
- Improved application performance via lazy loading, optimized change detection, and modular code organization.
- Proactively improved code quality using SonarQube by fixing duplicate lines and reducing code smells, enhancing application maintainability and performance.
- Participated in Sprint Planning, Grooming, Retrospectives, and daily standups to ensure alignment and timely delivery.
- Mentored junior developers, reviewed pull requests, and enforced coding standards for better code quality.

Project

Internal Enterprise Portal (Angular 18, TypeScript, HTML5, CSS3, RxJS)

- Led frontend enhancements for an enterprise portal spanning major modules like Planning, Metrics, Compliance, and Work Tracking.
- Implemented a dynamic Help icon feature across all tabs, linking to contextual video tutorials for improved user guidance.
- Developed multiple forms using Angular Reactive Forms, featuring radio buttons, multi-selects, validations, and conditional logic.
- Integrated Micro Frontends (MFE) for features like “Report a Problem,” enabling modular and scalable architecture.
- Designed and implemented diverse UI models including Expansion Panels, Grid Models, Overlay Panels, and Form-based interfaces for varied workflow requirements.
- Implemented notification-based deep linking, redirecting users from in-app notifications directly to specific tabs or form states to streamline the approval process.
- Created multiple approval workflow tabs with Angular Material expansion panels, allowing users to submit requests to delivery managers through dynamic, form-driven flows.
- Designed and embedded video tutorials within the portal to streamline onboarding and reduce support requests.
- Focused on reusable component design, REST API integration, error handling, performance tuning, and accessibility compliance.

Education

B.Tech in Electrical and Electronics Engineering

Kerala Technological University, Trivandrum | 2017–2021

Certifications

- Infosys Certified Angular Web Developer
- Infosys Certified Frontend Web Developer
- Infosys Global Agile Developer
